

Attention Herbicide Applicators: For New Formulations of 2,4-D and Dicamba

NCD&CS will submit 24(c) labeling for all products containing 2,4-D or dicamba intended to be used in conjunction with 2,4-D or dicamba tolerant crops (cotton & soybeans). The 24(c) label will require specific mandatory training and wind speed restrictions not to exceed 10 mph.

This mandatory training titled *Auxin Herbicides – Best Management Practices* presented by Dr. Alan York, Dr. David Jordan, or Dr. Wes Everman is intended to assist applicators in reducing incidents of herbicide drift to susceptible crops. **At least one applicator on each farm will need to complete the training prior to use of these new products.**

Applicators and dealers will receive 2 hours of pesticide recertification credit in categories N, O, D, and X upon completion.

Contact your local Extension Office or NCD&CS, Pesticides Section (919)733-3556 or www.ncagr.gov/SPCAP/pesticides for proposed meeting dates & locations of the training in your area (see back for details).

Meeting #	Date	Day of week	Time	Location (city)	Address
1	January 30	Monday	1 PM	Elizabeth City	Pasquotank County Center, 1209 McPherson St.
2	January 30	Monday	4 PM	Hertford	Perquimans Recreational Center, 310 South Granby St.
